

Be a good sort.
Help us divert 70%
of waste from
landfill by 2030.

Recycling

Diverting waste from landfill starts by knowing what can or can't go in your yellow recycling bin.

Put these items in your yellow bin:

- ✓ Aluminium and steel cans.
- ✓ Aluminium foil trays/pie dishes.
- ✓ Aluminium foil that has been crunched into a ball the size of a golf ball or larger, but no foil packets (such as chip packets).
- ✓ Glass bottles and jars (lids unscrewed).
- ✓ Hard plastic bottles and containers, such as, soft drink, shampoo and detergent bottles; icecream, yoghurt and takeaway containers; biscuit, cake and meat trays (no foam trays).
- ✓ Fresh and longlife milk and juice cartons.
- ✓ Paper, such as newspapers, magazines and letters.
- ✓ Flattened cardboard boxes and packaging, including empty pizza boxes (no food traces).

Make sure your recyclable items are open, empty and loose before putting them in your yellow recycling bin.

Put these non-recyclables in your red bin:

- Soft plastics, such as bread bags, cling wrap and frozen food packaging.
- Kitchen crockery and glassware, including drinking tumblers, wine glasses and toughened glass (such as Pyrex).
- Takeaway coffee cups (paper and polystyrene) and polystyrene food and drink containers.
- Nappies, sanitary items and incontinence products.

Take these items to a MidCoast waste centre:

- Large polystyrene items (EPS).
- Appliances and electronic waste (e-waste).
- Batteries.
- Clothing and linen.
- Mirrors, window/windscreen glass and light bulbs.
- Any metal that isn't a food or drink container.
